WINTER-FLOWERING BULBS for Greenhouse and Indoors

← **KING ALFRED DAFFODILS**
The large size bulbs of King Alfred are especially adapted to forcing. \$2.50 per doz.; \$18.00 per 100.

To Grow Tulips Indoors

A 6-inch bulb pan will hold 6 bulbs, while a 7-inch bulb pan will hold about 7 bulbs, etc. A good soil mixture to use consists of 1 part garden soil, 1 part Michigan Peat and 1 part sand. Place bulbs in bulb pans about 1 inch apart; cover with an inch of soil and water thoroughly. Put bulb pans in a coldframe or bury them in the garden below the frost line for 8 to 10 weeks. This forces root development. Bring bulb pans indoors, first in a cool room and gradually to the average room temperature. Daffodils and Hyacinths are treated likewise.

Town of Greenwich Grass Seed Mixture

For Sun or Shade

ESPECIALLY ADAPTED FOR THIS LOCALITY

This is the same formula that is used in the beautiful parks of the Town of Greenwich. Because of its high fescue content, it is adapted to shade and sun. This formula was first offered by us in limited quantity in 1952. Since then, time has proved it to be most satisfactory and very permanent. The repeat business on this new mixture also indicates to us that those who have tried it are most satisfied with the results. Lb. \$1.25; 5 lbs. \$6.00; 25 lbs. \$27.50; 100 lbs. \$100.00.
